Career Objective

Enthusiastic Computer Science student with a solid foundation in Data Structures and Algorithms. Seeking a Software Developer internship to apply and grow my technical and problem-solving skills in real-world projects.

SKILLS

- **Languages:** C++, C, Python
- **Web Development:** HTML, CSS, JavaScript
- **Machine Learning & AI:** Scikit-learn, Pandas, NumPy, Flask
- **Tools & Technologies:** Git, GitHub, VSCode
- **Database:** MySQL, MongoDB

PROJECT

Fake News Detection • GitHub Repo

Tech Stack: HTML, CSS, JavaScript, Flask, Scikit-learn, Python

- Built a responsive Fake News Detection web app with an ML model integrated into a Flask backend.
- Trained a machine learning model using Scikit-learn to classify news as real or fake.
- Designed a clean, responsive UI using Bootstrap and custom CSS.
- Organized the project structure for easy scalability and future enhancements.
- Prepared the app for future deployment to the cloud.

The Expense Tracker • GitHub Repo

Tech Stack: HTML, CSS, JavaScript, Flask, Python

- Explored and understood a full-stack expense tracker project using Flask and Bootstrap with support from ChatGPT.
- Implemented backend routing using Flask and stored data in JSON format for local use.
- Improved data access efficiency, increasing speed by ~30%.
- Packaged the app as a cross-platform desktop application using Electron.js

Portfolio • GitHub Repo

- Built a simple and fully responsive personal portfolio website to showcase my skills, projects, education, and contact information. Live Demo

EDUCATION

Raj Kumar Goel Institute of Technology (RKGIT) — **AKTU**, Lucknow
B. Tech – Computer Science and Engineering
CGPA: **7.5/10** (Till Present) • Expected Graduation: **2026**

Achievements

- **Solved more than 300+ (DSA) problems on LeetCode, GFG, Codechef**
- **Quick learner with strong Problem-Solving Skills**

Certificates

- **Coursera: Programming in Python**
- **NPTEL: The Joy of Computing using Python**
